

Assignment Sheet

(Session: 2023-24)

Assignment No	string	Subject	string
Branch	string	Semester	string
Unit	Multiple Units	Faculty	string
Date Given	string	Submission Date	string

Q.No	Questions	CO	Marks
Q1	Explain the difference between univariate and multivariate time series analysis and provide an example of when each would be appropriate to use	CO1	5
Q2	Derive the moving average and autoregressive terms for a second-order autoregressive model (AR(2)) for a given time series dataset	CO1	5
Q3	Justify the use of mean absolute error as a performance metric in time series forecasting, considering the impact of outliers on model performance	CO1	5
Q4	Compare and contrast the approaches of using RNNs and CNNs for time series prediction, discussing their respective strengths and weaknesses	CO1	5
Q5	Evaluate the impact of using a trailing window versus a centered window when preparing input data for time series forecasting. Provide a scenario where one might be preferred over the other	CO1	5

Department of Artificial Intelligence

G H Raison College of Engineering & Management

An Autonomous Institute Affiliated to Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur

Accredited by NAAC with A+ Grade

Shraddha Park, B-37-39/1, MIDC, Hingna-Wadi Link Road, Nagpur-440016(INDIA) T:+91-
