Date Given	string	Submission Date	string

Q.No	Questions	CO	Marks
Q1	## Your task: Create an advanced, comprehensive exam question about the creation, usage, and optimization of TensorFlow's tf.data.Dataset object, ensuring to include the concepts of dataset creation, iteration, and data preprocessing. Explain how to load and preprocess data from various sources such as lists, tensors, text files, and TFRecord files using TensorFlow's Data API. Demon0.5	CO1	5
Q2	## Your task: Based on the provided document extract, create a more complex question that requires multiple-step reasoning to solve a problem that incorporates the principles of Time Series Analysis, using Python for implementation. The question must ask to:	CO2	5
Q3	##### Solution:	CO1	5
Q4	What is the maximum number of years of age for which we can reasonably apply these models given the following constraints:	CO2	5
Q5	1. How to create a TensorFlow dataset from a Python list and apply a map transformation on it?	CO1	5
