

Assignment Sheet

(Session: 2023-24)

Assignment No	2	Subject	PML
Branch	AI	Semester	7th
Unit	Multiple Units	Faculty	Chay
Date Given	28/03/2026	Submission Date	30/03/2026

Q.No	Questions	CO	Marks
Q1	What is the open-source machine learning framework released by Google called? (Answer: TensorFlow)	CO1	2
Q2	How can you install TensorFlow using pip on Windows without GPU support? (Installation Steps Provided Below in Question Format)	CO1	2
Q3	Explain eager execution and its benefits introduced with TF 2.x, keeping the explanation within a couple of sentences only. Eager Execution is an immediate execution mode that allows operations to run right away rather than deferred until session evaluation time, which simplifies debugging and experimentation by providing more interactive capabilities in Python without requiring explicit session starts or ends (Answer: Benefits include ease of use for testing purposes)	CO1	2
Q4	Which pre-trained model is used often for image classification tasks with TensorFlow? (Answer: Inception)	CO1	2
