

Assignment Sheet

(Session: 2023-24)

Assignment No	4	Subject	OOPS
Branch	CSE	Semester	8th
Unit	Multiple Units	Faculty	Dishu
Date Given	2026-03-28	Submission Date	2026-04-01

Q.No	Questions	CO	Marks
Q1	Define a dataset using Python list and apply the map transformation to double its values. How can this be achieved? (Python code not required)	CO1	2
Q2	Explain how filtering works in TensorFlow's Dataset API with an example condition of keeping only even numbers from [1, 2, ..., 10]. What would remain after applying such a filter?	CO1	2
Q3	Describe the batch operation and demonstrate its application by combining elements into groups of size four using dataset[5:8] in TensorFlow's Dataset API examples (Python code not required)	CO1	2
Q4	Illustrate how shuffling can change data order with an example, assuming initial list [10, 20, 30, ..., 90]. What might be one possible outcome after a random permutation? (Python code not required but conceptual understanding needed)	CO1	2

Department of Artificial Intelligence

G H Raison College of Engineering & Management

An Autonomous Institute Affiliated to Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur

Accredited by NAAC with A+ Grade

Shraddha Park, B-37-39/1, MIDC, Hingna-Wadi Link Road, Nagpur-440016(INDIA) T:+91-
